

## Payment options

### Credit card

Your payment via Visa or MasterCard:

Your credit card details will be requested after completing your order. If a card with 3D-Secure is used for payment, this is automatically recognized. If your bank participates in this procedure, an input field will open during checkout that connects you to your bank. You can find out directly from your bank advisor whether your personal bank participates in the procedure.

Your credit card will be charged immediately with the payment amount. A credit to your credit card account in the event of a cancellation will be made within 14 working days.

The data transfer is encrypted via SSL.

### Giropay

With giropay, you can pay via online transfer in the secure online banking of your bank or savings bank participating in giropay.

Without additional registration you simply use PIN and TAN from your online banking. The data transfer is encrypted via SSL.

### Sofortüberweisung

Your payment with Sofortüberweisung directly with your online banking account:

After entering your bank details (IBAN and BIC), you will be redirected to your bank's page. You do not need to register, but only need your access data of the online banking of your bank (PIN number and TAN) for the payment with Sofortüberweisung.

After completing the Sofortüberweisung click on your bank page "Back to the store". This way we receive an immediate confirmation and can activate your internet access.

The data transfer is encrypted via SSL.

## Paydirekt

paydirekt is an online payment procedure of the German banks and savings banks:

You will then be automatically redirected to the paydirekt website. Here you can log in with your username and password or register for paydirekt. You can link your current account at your bank or savings bank directly with paydirekt.

German banks and savings banks offer their customers the possibility to use paydirekt. Please contact your bank to find out whether your bank or savings bank is also included.

After completing the payment, click "Back to store" on your bank page. This way we receive an immediate confirmation and can activate your internet access.

The data transfer is encrypted via SSL.
